

Now Recruiting Engineer - Post Production

About us:

dock10 is the UK's leading television facility based at the heart of MediaCityUK in Manchester, providing Studios, Post Production, Media Services, Telecoms & Consulting to our extensive range of clients.

This is a unique opportunity to join one of the leading Technology teams in the UK broadcasting industry. This position will supplement the Technology team's current Post Production support operation and will report into the Duty Technology Management team.

About the role:

We are looking for enthusiasm, experience and specialist skills in Post Production support. We expect all applicants to have prior broadcast industry or equivalent experience within the Media and Creative Industry. Applicants for the engineering role will need to demonstrate a solid foundation in broadcast engineering, excellent operational support experience and have extensive experience of broadcast systems.

You will be responsible for the installation, maintenance, and on-going support of the UK's leading television facility.

Applicants will have excellent client facing skills and a dedication to ensuring the highest standards of service level agreements are adhered to.

You will be used to working in a busy broadcast environment as part of a team delivering and supporting a host of services including high-end 4K HDR drama workflows, 3D VFX, contributions to live transmissions, studio ingest, QC and cutting edge Post Production remote workflows.

What we are looking for:

We very much welcome applications from all sections of society to a business where diversity and inclusion is highly valued and is at the heart of the way we operate.

Your work activities will conform to industry and company standards.

You will know and understand customers and their needs and expectations and seek to help them achieve their goals.

You will keep up to date with technology and industry developments, always seeking to improve work practices and processes and personal performance.

Experience or expertise in the following areas would be advantageous: Avid Media Composer, Avid MediaCentral Production (Interplay), MAM, Nexis, Isilon storage, Content Agent, Protocols, Dante audio, Adobe Premiere.

You will have a 'can do' attitude – essential for the dock10 technology team

How to Apply:

Simply email your CV and a brief covering letter explaining why you would be great for the role to jobs@dock10.co.uk by Friday 1st July 2022 and we'll be in touch.
